

Lucidiom Release Notes

2010.1 Creative Content Release June 2010

APM version 7.5 features a revamped user interface designed to give your customers as many options as possible while making it easy to build creative products telling their story. With the introduction of "free-form layouts," which allows customers to resize, move, rotate and remove photo boxes and text boxes as they see fit on the page, all previous content has undergone a transformation to make things faster and less confusing for the customer.

Things you should know before installing include the following:

- These installers will delete old content and install all of the newly updated files. Nearly every file has changed with this content release to make free-form layouts possible.
- If you have any custom Folio content installed (your own or 3rd-party), make sure that it is **not stored** in the C:\APM_FOLDERS\Packages\Folio Content\ folder. This folder is designated for Lucidiom use only and will be deleted during this installation. Custom content should be stored in C:\APM_FOLDERS\Packages\Custom Content\ to prevent any conflicts in future content installation.
- The three discs (or downloads of the disc content) need to be installed sequentially and include a directory listing of all files included on each disc.
- The discs do not contain the update to the EQ Gifting products. If you are an EQ Gifting client and have not updated to 2010.1 EQ Gifting, please do so now. This installer is available via Lucidiom Downloader.
- The discs do not contain the Wrapping Paper content. If you have purchased the Wrapping Paper license, you will need to re-install the Wrapping Paper content after you have finished Discs 1-3 of this install. If you do not still have the original Wrapping Paper installer, it will be available in your Lucidiom Downloader account.

Updates to the existing content base include the following:

- Free-form layouts are available for Photo Books in 11x8.5, 8.5x11, 12x12, 10x8, A4 and A5 sizes.
- Free-form layouts are available for Calendars in 11x8.5, 8x6, A4, A5 and 12x12 sizes.
- Free-form layouts are available on Posters and Banners with less than 8 photo boxes.
- Calendars with holidays for the US, UK and CA are now available as well as calendars without holidays.
- 12x12 Calendars are back! (You asked, we listened.)
- Calendars in 11x8.5, 8x6, A4, A5 and 12x12 now include "Starts with" options for May-December 2010 for 12 month calendars, a full year for 2011, and a full year for 2012. Rather than overwhelm your customer with options on-screen, the current month, previous month and next month will be displayed at any given point in time. As the year draws closer to the end, older

options will disappear and new options will appear on-screen to keep your content looking fresh.

- Noritsu Perfect Bind Books and Book Covers are now merged into our main content build. If you originally installed our separate installer designed for use in processing photo books on the D502, all of your content is now part of the main installer.

To help get things updated and in place for the upcoming holidays, we've also created a list of all products that have content designed for them in these installers AND a list of products that can only be printed duplexed.

All products included in this content release:

Banners			
Product ID	Name	Name	Product ID
6291	10 x 30 Banner	30 x 10 Banner	6293
