Lucidiom Release Notes

2010.2 Creative Content Release
August 2010

The New Features:

- **New Posters –** Sleek, new Collage Posters feature 1-26 photo placements in 42 new designs in portrait and landscape orientation. Available in 12x18/18x12, 20x30/30x20, and 24x36/36x24 sizes.
- **New Calendar Products –** Everyone needs a new calendar heading into the new year, and now you can offer them in 8.5x11, A4 Portrait, and A5 Portrait sizes in addition to the expansive list already available in release 1. These three new calendar sizes are designed for single-sided printing, which makes them great products for any lab.
- **New Banners –** Nine new banner designs added to 72x24", 36x12", 30x10", and 24x8" product offerings.
- **New "Black Book" option –** The option to order a book with all black backgrounds is now available in every book size.
- **New Occasions –** Added Anniversary, Congrats, and Memorial occasions.

Improvements:

- **Revamped 6x8, 8x10, and 8x12 Calendars –** Everything has been replaced and rebuilt. These sizes as well as the new sizes are now available in ten styles.
- **Return of 12x18 Calendars –** Just in time for the holidays.
- **2011 and 2012 calendars now display year-round –** Our beta customers were kind enough to provide feedback on the new display feature for calendars, so these designs are now available year-round starting as soon as you install release 2010.2!
- **Updated "Create-Your-Own" 5x7 Folded Card –** The card now allows for full-image or full-text on all four pages of the folded card. (A perfect way for those at home designers to come in and print their totally custom cards.)
- **Optimized banner layouts and backgrounds –** Resized and redesigned to address occasional memory issues while rendering the completed product.
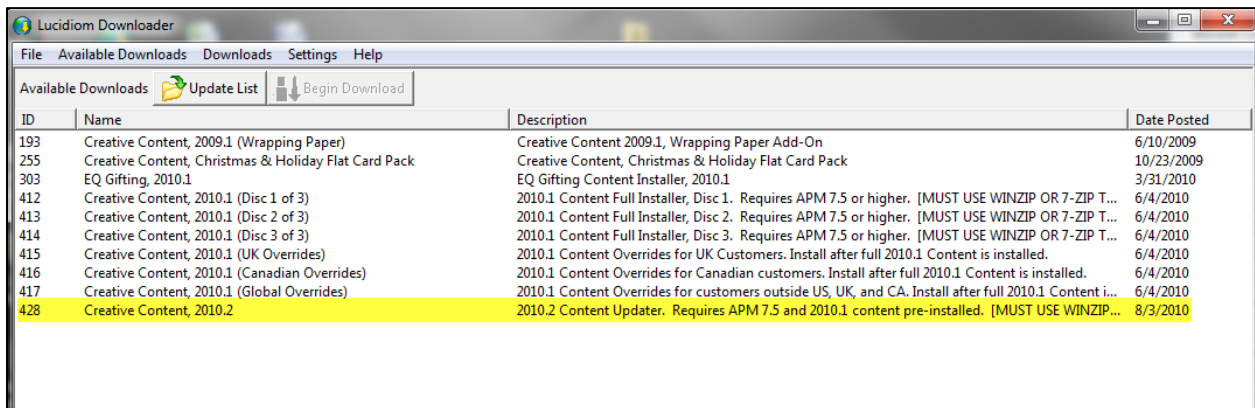

Fixes:

- Corrected 2012 calendar issue for 11x8.5 duplex calendar.
- Locked 10x8 Photo Book first page to correlate with the keyhole in the book cover.
- Corrected business card output information.
- Modified full-page photo layouts to not output a border by default.

Prerequisites for Installation:

This release is an **update** to the base content release (2010.1). Before running this 2010.2 update, you must have already installed the 3-disc set labeled "2010.1" (released in July 2010 along with APM v7.5) and any applicable locale-specific content overrides, such as UK, Canada, or Global overrides.

How to install:

Run the Lucidiom Downloader (more info: www.lucidiom.com/support) and select Content 2010.2 to download. Once downloaded, unzip/extract and run the Setup.exe.

Additionally, if you have previously installed overrides, you will need to also install them for this release. The overrides for the calendars are packaged within the Release 2010.2 folder that is created when you extract the downloaded zip from the Lucidiom Downloader. To install the calendar overrides, open the **Calendar Overrides** folder and then the customizer folder appropriate for your setup. Run the Setup.exe file as done previously to complete your customization.

Product Details:

To help get things updated and in place for the upcoming holidays, we've also created a list of all products included in *this* release. For a full-listing of products, please see the Release Notes pages available on Lucidiom's Wiki website at http://wiki.lucidiom.com/display/DOC75/Release+Notes.
