

Lucidiom Release Notes

2011.3 Creative Content Release October 2011

Fixes:

- March 29th was missing from some grids, and the 31st was repeated.
- June and September 24th were not properly aligned with the rest of the dates.
- Christmas was mislabeled as Christmas Eve on December grids
- Labor Day was incorrectly listed as September 9th on US grids.
- Easter was incorrectly listed as April 9th.

Prerequisites for Installation:

This release is an **update** to the 2011 base content releases. If you have not installed 2011.1 Discs 1-3 and the 2011.2 content updater, they will need to be installed before installing this updater.

If you have installed any overrides for calendars in previous versions, you **will** need to reinstall them using **this** updater only.

How to install:

Run the Lucidiom Downloader (more info: www.lucidiom.com/support) and select Content 2011.3 to download. Once downloaded, unzip/extract the files and navigate to the folder appropriate for your location. There are separate installers all bundled in this package for US, UK, and CA holidays as well as a no holidays options. Once you are in the appropriate folder, run the Setup.exe.
