Message Customization and Localization

While the vast majority of the Photo Finale platform is localized into a variety of languages, there are a limited number of strings that default to English but can be customized on a per-dealer basis by request through our support team. The following messages can be overridden to provide localization for a dealer's primary language, or simply customization to better reflect their brand.

Customizable Messages

Name	Description	Default
mobile_notification_msg_order_shipped	SMS text when a mail order is marked complete	Your order #{%order_number%} from {%dealer_name%} has been shipped. Keep an eye on your mailbox!
