

Chapter 6 - Lab 50 Administration

Lab 50 offers a wide-range of configuration options to customize your Photo Finale website to fit the needs of your lab. Some of these settings, however, are intended to only be used by certain store employees.

The pages that follow in this chapter outline how to specify account permissions for different users, so you can make sure the right people are accessing your configuration settings, setup online payment processing for your provider, and collect sales information. Use the right panel to jump to a specific topic, or click a keyword below to browse relevant pages.
