

Photo printing on Invoice

If a photo is being printed on all of your invoices generated from Lab 50, there may be a conflict with your loaded invoice logo image.

To resolve this issue, the invoice logo should be reset within Lab 50.

To change the invoice logo, please do the following:

1. Access **Store Management > Brand Settings and Logos**.
2. Select the brand you would like to edit, as there may be more than one, then click on the **Logos** tab to edit the logo used for your brand.
3. Select the *Invoice Logo* option within the logos listing, then click the **Change** button and locate the file on your hard drive.
4. Select to *Save Changes*, then restart Lab 50.
