

Recommended product print settings for Holiday 4x8 and 5x7 double-side products using the EQ-9850

Lucidiom's 2010 Holiday Pack features several new products, including double-sided 5x7 and 7x5 cards. The attached screenshots indicate the recommended product print settings as provided by the content team. While Lucidiom does not sell paper in these sizes, it is very easy to cut down existing paper types in your store, such as 5x7 folded cards, to create the necessary sizes for processing.

If you do not have a paper cutter in your store, you can purchase a guillotine paper cutter direct from your regional sales representative.

The configuration settings below will allow the products to print with the standard white edge around the product, if you'd prefer to print full-bleed (on paper that is 1 inch longer on each edge), use the same settings, but check the box for full-bleed printing and then trim the products after printing to produce the edge-to-edge print :

4x8 Double-Sided Card
(Product ID 6029)

8x4 Double-Sided Card
(Product ID 6032)

5x5 Flat Card
(Product ID 6034)

5x5 Double-Sided Card
(Product ID 6033)
