

# New card readers for APM 2700

If you have recently replaced the card reader for your APM 2700, you'll need to select an alternate model number while updating your kiosk software in order for the APM software to pick-up the new drive assignments.

Please reference the sample photos below to determine the correct reader type to select for your installation:

## APM 2701 --Original Card Reader:

## APM 2703 – FT-7 (Flytech Gen 3.):

## APM 2704 – DR-7 (Atech Card Reader):
